

Protect yourself from the deadly Ebola virus

Do you know...

that certain strains of the Ebola virus have a mortality rate of up to 90 %?

In 2014 the largest outbreak of Ebola in history have killed more than 1000 people in West Africa alone.

Nanofibers
save lives

LIFE'S WORTH IT

ReSpimask[®]

NANO FIBER

- ♥ The unique nanofiber membrane captures all dangerous viruses incl. Ebola
- ♥ Using face masks as a preventive measure against Ebola has been strongly recommended by the Centers for Disease Control and Prevention (USA)
- ♥ The nanofiber face mask offers effective protection against microorganisms while remaining perfectly permeable to air, thus allowing easy breathing
- ♥ Ergonomic shape, adhesive strips and three different sizes (S, M and L); these features guarantee a perfect face fit for everyone
- ♥ ReSpimask[®] is an effective, simple and comfortable way to protect the whole family
- ♥ ReSpimask[®] does not contain any chemicals or silver particles
